

Choenyane Samuel

Information Systems Honours Student | Software Developer | Power BI & SQL | Business Analysis

East London, Eastern Cape | +27 76 799 9171 | choenyanekgao18@gmail.com | [LinkedIn Profile](#) | [Portfolio Address](#)

Professional Profile

Information Systems Honours student and cum laude BCom graduate with hands-on software development experience across web, mobile, and backend systems. Built and contributed to real applications using Flutter/Dart, Python/Flask, ASP.NET/C#, SQL, PostgreSQL, and Supabase, backed by strong requirements analysis, database design, and Power BI/data analytics skills. Portfolio includes a mobile inventory and cash-tracking app, a telehealth web platform, a graduate job-matching system, and Power BI analytics dashboards. Seeking an entry-level Software Engineer role where I can apply full-stack development skills and a business-analysis mindset to real-world problems.

Skills

Technical: ASP.NET/C#, Flask, Flutter/Dart, SQL, PostgreSQL, Supabase, SQLite, HTML, CSS, JavaScript, API integration, Git/GitHub

Data & BI: Power BI, Power Query, DAX, dashboard design, data cleaning, Excel

Business & System Analysis: Requirements gathering, business problem analysis, process improvement, user workflows, system documentation, testing & user support

Professional: Analytical thinking, problem-solving, communication, teamwork, leadership, time management, attention to detail, adaptability

Education

Bachelor of Commerce Honours in Information Systems — University of Fort Hare, East London | 2026–Current

Bachelor of Commerce in Information Systems — University of Fort Hare, East London | 2023–2025

- Completed in record time; graduated cum laude

National Senior Certificate — Moreko Senior Secondary School | 2017–2020

Experience

FEB 2025 – OCT 2025

Project Manager: Final-Year System Development Project — University of Fort Hare

- Coordinated a team-based system development project: organised tasks, tracked progress, supported delivery against requirements
- Contributed to database planning, front-end and back-end development, testing, documentation, and presentation of the final solution

JUL 2025 – OCT 2025

Tutor: Systems Design and Implementation — University of Fort Hare

- Supported students with practical system development projects, requirements understanding, system logic, and project documentation. Reviewed and marked assignments accurately while explaining technical concepts clearly

MAR 2025 – JUN 2025

Tutor: Introduction to Programming — University of Fort Hare

- Assisted students with programming logic, debugging, and problem-solving support. Developed communication, patience, and technical support skills through student-facing work

SELECTED PROJECTS

BekaStok — Small Business Inventory, Sales & Cash Tracking App | Independent Project, In Development

Tools: Flutter, Dart, SQLite, Supabase, PostgreSQL

- Building a mobile-first app for stock, sales, credit, cash-up, expenses, and supplier/employee management for small and informal businesses
- Designed around real shop challenges: unclear pricing, forgotten customer credit, weak restocking and stock visibility
- Implemented key features: local SQLite storage with Supabase sync, branded PDF restock exports, expiry tracking, and role-based permissions

JobConnectSA — Graduate & SME Job Matching System | Final-Year Project

Tools: ASP.NET/C#, SQL, HTML, CSS

- Designed and implemented components of a graduate recruitment platform using ASP.NET Web Forms and SQL Server.
- Developed database structures supporting employers, graduates, job postings and applications.
- Participated in requirements analysis, testing, and documentation

Customer Churn Analytics Dashboard — Power BI Portfolio Project

Tools: Power BI, Power Query, DAX, DataCamp customer churn dataset

- Cleaned and transformed a churn dataset in Power Query. Handled missing values, inconsistent formatting, duplicates, and data types
- Built dashboard pages covering churn overview, customer segments, churn reasons, contract/payment behaviour, and retention insights
- Used DAX measures, cards, charts, and slicers to communicate churn patterns and business recommendations clearly

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Power BI Dashboard Development — 2026
- Microsoft AI Fluency Course — 2025
- ICANN DNS Capacity Building Programme — 2025

RESEARCH INTEREST

Honours-level research interest in student AI literacy, responsible AI use, academic integrity, and critical thinking in higher education.
